

## Claims

I claim

1. A device, consisting:
  - (a) a base.
  - (b) an elongated article with a sharp tip.
  - (c) means for attaching said device to a water cooler.
2. Said elongated article with a sharp tip of claim 1 is sharp enough to puncture a bottle's cap.
3. Said elongated article with a sharp tip of claim 1 is of sufficient length allowing the puncturing of a bottle's cap.
4. Said elongated article with a sharp tip of claim 1 is of sufficient strength to hold the weight and pressure of a bottle full with water placed on said device of claim 1.
5. Said device of claim 1 is an independent structure,
6. Said device of claim 1 is an integral structure of a water cooler.
